

What can a C&E module in EURISCO give us?

Forage and Barley ECPGR workshop, 14-16 March 2017, Malmö, Sweden

Stephan Weise
14 March 2017

BACKGROUND

C&E data I

- Previously not available in EURISCO
- Of high importance to users of PGR data
 - Determines value of germplasm for breeding and research
- Difficult to handle due to lots of “standards”
 - Different descriptor names/synonyms
 - Different rating scales
 - Nominal, ordinal, metric scale
 - Different amounts of meta information
 - When, where, how, by whom?
 - Experiment set-up, treatment etc.

C&E data II

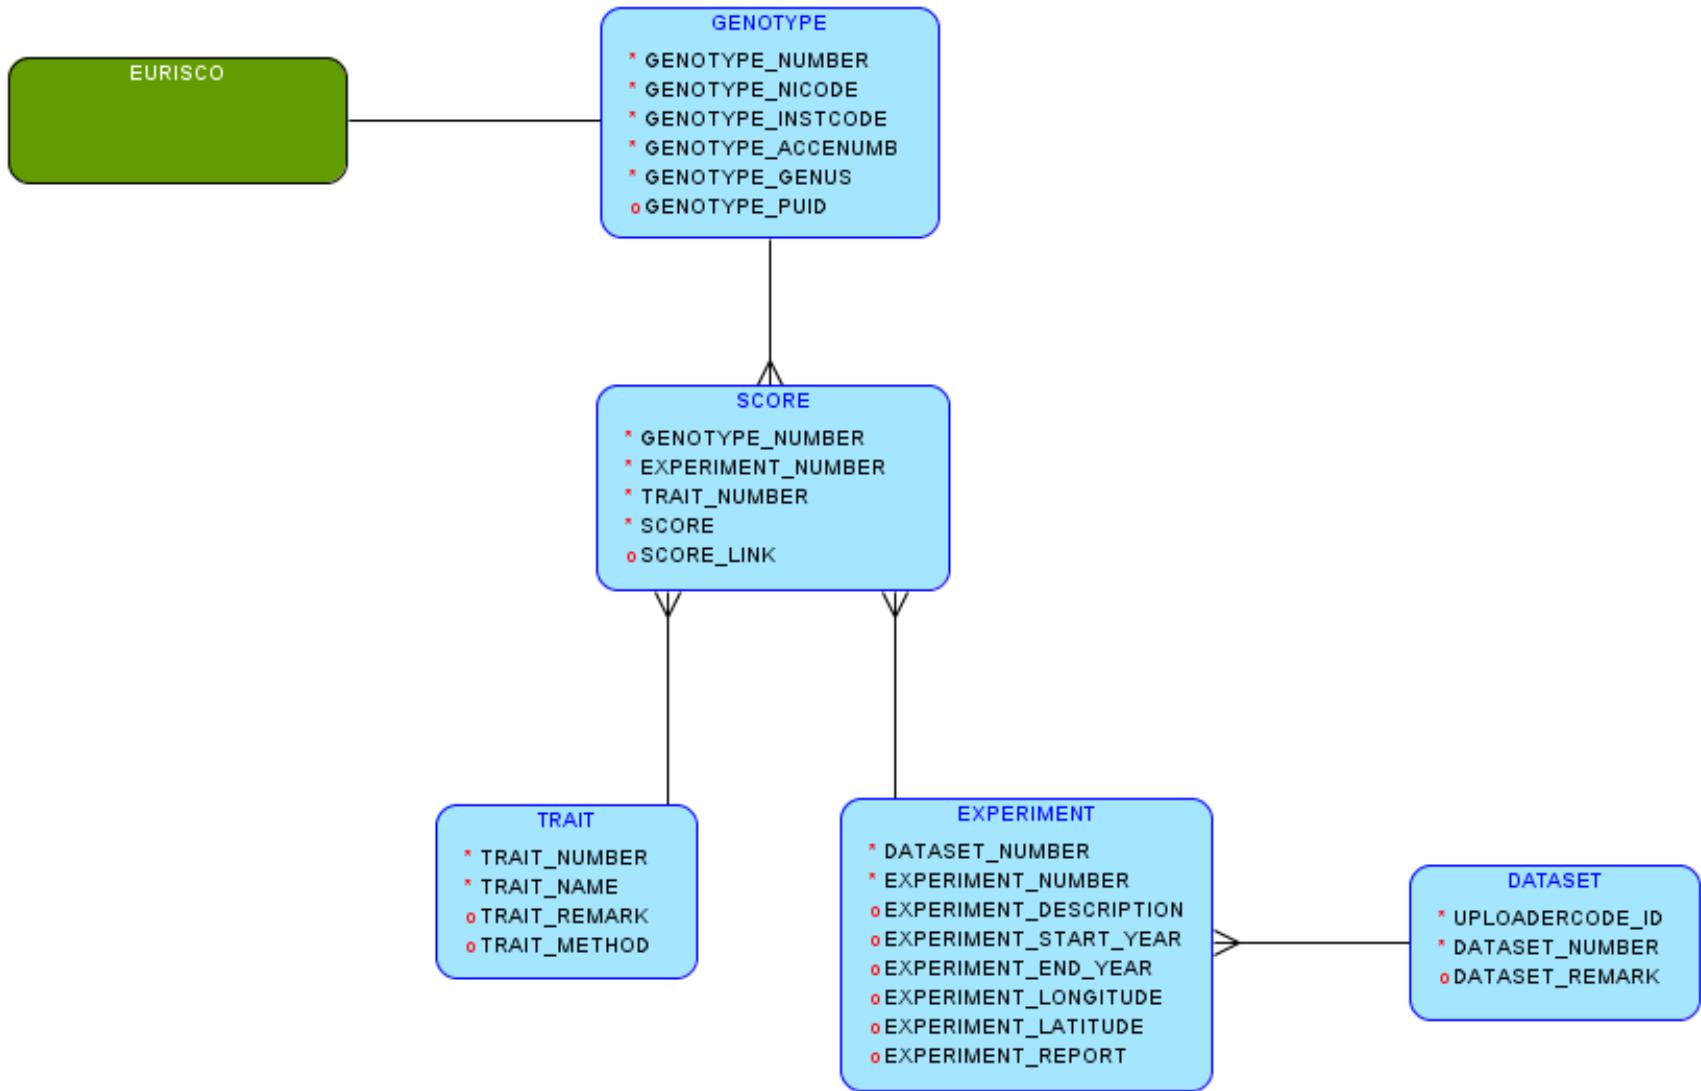

- Discussed in detail in previous years
- Suitable proposal compiled by the ECPGR Doc&Info Network in 2009
 - As simple as possible
 - As few fields as possible
 - “minimum consensus”
- D&I meeting 2014
 - Pragmatic approach:
 - No standardisation of trait, scale or experimental design
 - Only standardisation of exchange format (as simple as possible)
 - Import of existing data as-is → reach critical mass
 - Use proposal of 2009 (+ small adjustments)

DATA MODEL

Data model for C&E data I

- Five components
 - **GENOTYPE**
 - Identified by EURISCO descriptors
 - **DATASET**
 - May comprise different experiments
 - **EXPERIMENT**
 - Multiple genotypes are scored for different traits
 - **TRAIT**
 - Characteristic feature to be scored
 - **SCORE**
 - Value of a trait for a genotype

Data model for C&E data II

TEMPLATES

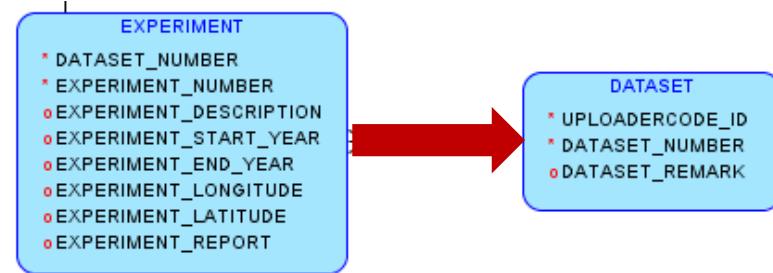

DATASET

- Enables to upload multiple experiments at once
- Fields:
 - **UPLOADERCODE***:
 - ID of registered authorised data provider
 - Provided by EURISCO
 - **DATASET_NUMBER***:
 - To link experiments with datasets
 - Unique and persistent for the data provider
 - **DATASET_REMARK**:
 - General remark for all scores in the dataset

UPLOADERCODE	DATASET_NUMBER	DATASET_REMARK
DEU	1	This dataset contains forage grass accessions of IPK.
...
...

EXPERIMENT I

- Meta data helping to interpret C&E data
 - Experiment set-up
 - Weather conditions
 - Soil conditions
 - Experiment location
 - ...
- Fields:
 - **DATASET_NUMBER***:
 - Reference of the dataset
 - **EXPERIMENT_NUMBER***:
 - To link scores with experiments
 - Unique and persistent for the data provider

EXPERIMENT II

- Fields (cont.):
 - EXPERIMENT_DESCRIPTION:
 - Brief English description
 - Information necessary for interpreting the scores, e.g. set-up
 - EXPERIMENT_START_YEAR:
 - Year in which the experiment was performed (or started)
 - EXPERIMENT_END_YEAR:
 - Year in which the experiment ended
 - EXPERIMENT_LONGITUDE:
 - Longitude of experimental site
 - EXPERIMENT_LATITUDE:
 - Latitude of experimental site
 - EXPERIMENT_REPORT:
 - Reference to a report (either report file or report URL)

EXPERIMENT III

DATASET_NUMBER	EXPERIMENT_NUMBER	EXPERIMENT_DESCRIPTION	EXPERIMENT_START_YEAR	EXPERIMENT_END_YEAR	EXPERIMENT_LONGITUDE	EXPERIMENT_LATITUDE	EXPERIMENT_REPORT
1	1	Characterisation data of Lolium perenne	1999	2000	11.278414	51.826059	http://...
1	2	Characterisation data of Lolium perenne	2000	2001	11.278414	51.826059	http://...
1	3	Characterisation data of Lolium perenne	2001	2002	11.278414	51.826059	http://...
1	4	Evaluation data of Lolium perenne (4 replications per accession)	2002	2005	11.278414	51.826059	http://...
...

TRAIT I

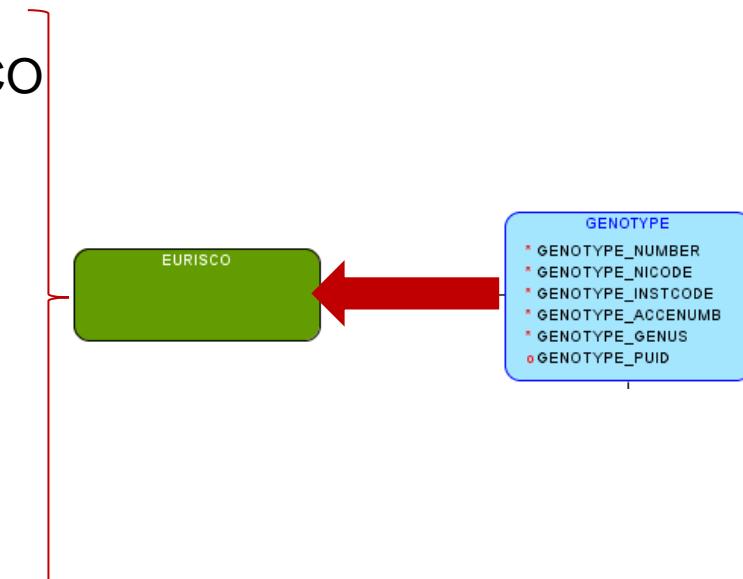

- Describes phenotypic traits and the methods used for scoring
- Fields:
 - **TRAIT_NUMBER***:
 - Unique, temporary number of the trait in the dataset
 - **TRAIT_NAME***:
 - English name of the trait
 - **TRAIT_REMARK**:
 - General remark helping to interpret the trait
 - **TRAIT_METHOD**:
 - English description of the used method + scale

TRAIT II

TRAIT_NUMBER	TRAIT_NAME	TRAIT_REMARK	TRAIT_METHOD
1	Sowing date	...	Date
2	Emerging date	Date, when first shoot is visible	Date
3	Growing before winter	Quality of plant growing before winter	Rating value from 1 (min) – 9 (max)
4	Stem height min	In flowering time, the shortest plant	Measurement [cm]
...

GENOTYPE I

- All accessions for which C&E data will be uploaded
- Fields:
 - **GENOTYPE_NUMBER***:
 - Unique, temporary number of the genotype in the dataset
 - **GENOTYPE_NICODE***:
 - National Inventory code from EURISCO
 - **GENOTYPE_INSTCODE***:
 - Holding institute code from EURISCO
 - **GENOTYPE_ACCENUMB***:
 - Accession number from EURISCO
 - **GENOTYPE_GENUS***:
 - Genus from EURISCO
 - **GENOTYPE_PUID**:
 - Placeholder for a permanent unique identifier (DOI → ITPGRFA)

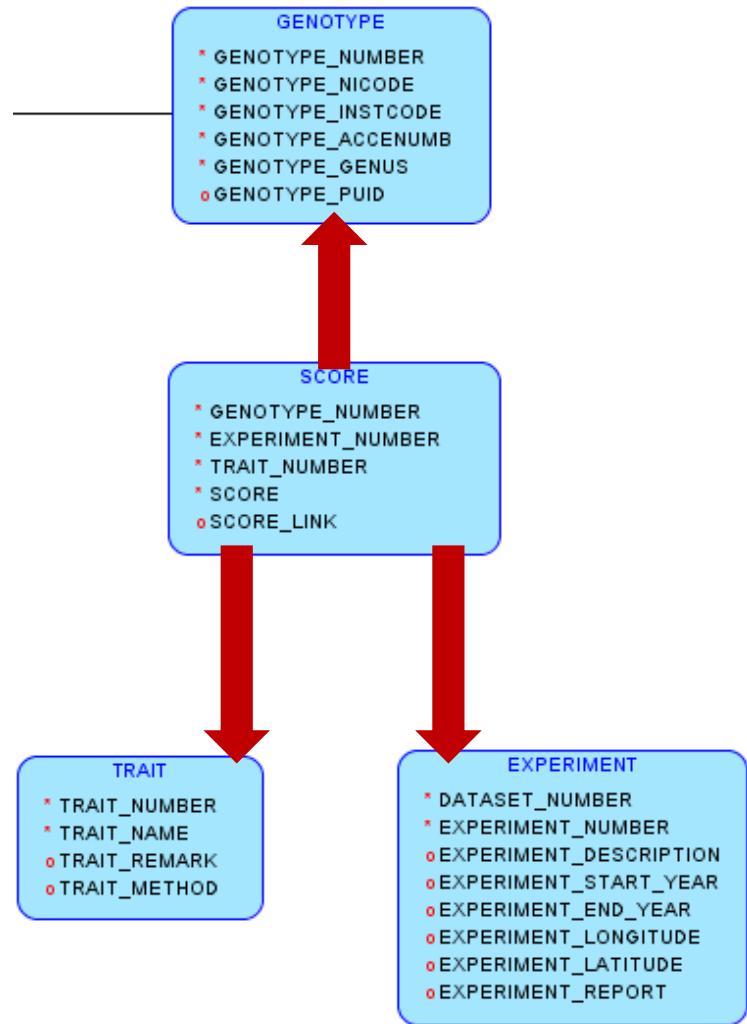

GENOTYPE II

GENOTYPE_NUMBER	GENOTYPE_NICODE	GENOTYPE_INSTCODE	GENOTYPE_ACCENUMB	GENOTYPE_GENUS	GENOTYPE_PUID

3	DEU	DEU271	GR 550	Lolium	
4	DEU	DEU271	GR 2670	Lolium	

SCORE I

- Observed phenotypic values of the accessions
- Fields:
 - **GENOTYPE_NUMBER***:
 - Reference to a genotype
 - **EXPERIMENT_NUMBER***:
 - Reference to an experiment
 - **TRAIT_NUMBER***:
 - Reference to a trait
 - **SCORE***:
 - Observed score
 - **SCORE_LINK**:
 - Link to a publication on accession level

PROCEEDING

Proceeding for data upload I

- Prerequisite:
 - Only non-confidential C&E data
 - Only data of accessions listed in EURISCO
- Impact
 - NFPs responsible for data upload (Data Sharing Agreements)
 - May nominate users for (sub) accounts for data uploads
 - NFPs must approve data before publication
- Data formatting
 - According to the templates in MS Excel (.xlsx) files
 - One file for each template
- Upload via EURISCO intranet

Proceeding for data upload II

- Three steps
 1. File parsing and upload via Java tool
(data owner / NFP)
 2. Data integrity checks
(EURISCO management)
 3. Approval / withdrawal of data for publishing on the EURISCO website
(NFP)

Upload of C&E data files I

EURISCO uploader

Welcome: WEISE Logout

Home Passport data import C&E data import

Upload C&E files

Decision about C&E update

Home > Upload C&E files

First step: Upload C&E files

Next step

The first step of importing new C&E data into EURISCO is to upload the filled template files to the EURISCO server. The files must be formatted in accordance with the EURISCO C&E data exchange format. The data must be contained in five separate MS-Excel (.xlsx) files.

Please use the Java WebStart application for uploading: [Start the EURISCO C&E data importer](#).

The Java application will enable you to select the five template files. These files will then be parsed and the content will be uploaded into the EURISCO staging area. At the staging area, all necessary integrity checks will be performed. Afterwards, the results of the checks will be displayed in the EURISCO intranet again.

Requirements:

- The upload tool requires a Java runtime environment version 8 including Java Webstart.
- For the database access, the Oracle standard port 1521 needs to be enabled.

Second step: Data integrity checks

The second step of importing C&E data into EURISCO is to perform data integrity checks. In the report below, you can see the current import status of your data (setup finished, import running, import finished). On the sub-pages, all errors will be listed (grouped by descriptor).

Third step: Publish or discard new data

After you have reviewed the errors which occurred during the C&E data integrity checks, the third step of importing C&E data into EURISCO is now to decide either to publish the new data to the EURISCO web frontend or to discard the imported data. In the latter case, the whole C&E data import procedure should be repeated with a reworked data set.

File parsing
and upload

Home > Upload C&E files > C&E check results overview > Decision about C&E update > Final decision about C&E data update

Final decision about C&E data update

Your uploaded C&E data has been checked for integrity and can now be used for publishing in EURISCO. Only valid data will be used; data which contains errors will be skipped.

The final update will run as a batch job in the background.

Next steps (in background)

- New dataset will be applied to EURISCO stage schema
 - Existing C&E data will not be overwritten
 - Existing C&E data may be removed on request
- EURISCO stage will be synchronised to the EURISCO web schema (Time lag!)
 - Not in main business hours
 - Rebuild of materialised views
 - News message on EURISCO webpage
