

# EuroPepLand – work planning

*EUROPEPLAND– Implementing a trans-EUROpean PEPper LANDrace collection for resilient agriculture*

*31 October 2024, Almeria, Spain*

# Project tasks

**Project start = 01 September 2024**

**Project end = 31 August 2026**

**Task 1 – Core collection development (M1-M6)**

**Task 2 – Phenotyping and genotyping (M6-M18)**

**Task 3 – Data analysis and integration (M19-M24)**

**Task 4 – Meetings and dissemination (M1-M24)**

# Task 1 – Core collection development (M1-M6)

1. All *Capsicum annuum*
2. All landraces from Europe mainland  
300 (Traditional cultivar/landrace)

mandatory

Accession Name	Accession N°	Country	Location (Region or coordinates)	Shape	Color at Maturity	Pungency
Papacella	21-PT-41	Italy	Campania region	Round	Red	Sweet
Sigaretta	21-PT-163	Italy	Calabria region	elongated	Red	Pungent
Peperone di Senise	22-PT-101	Italy	40°08'N 16°17'E	conical	Red	Sweet

Biological status (if in EURISCO)	DOI

More details in the phenotyping section

- Define the collection
- Include broad diversity in terms of provenance and main traits

## Task 2 – Phenotyping and genotyping (M6-M18)

Accession Name	Accession N°	Shape	Color at Maturity	Color at Immature stage	Fruit size	Pungency
Papacella	21-PT-41	Round	Red	Medium Green	Large	Sweet
Sigaretta	21-PT-163	elongated	Red	Medium Green	Small	Pungent
Peperone di Senise	22-PT-101	conical	Red	Light green	Intermediate	Sweet

- 1 Oblate
- 2 Circular
- 3 Cordate/heart-shape
- 4 Blocky
- 5 Rectangular
- 6 Trapezoidal
- 7 Conical
- 8 Elongated
- 9 Hornshaped

- 1 White
- 2 Lemon-yellow
- 3 Pale orange-yellow
- 4 Orange-yellow
- 5 Pale orange
- 6 Orange
- 7 Light red
- 8 Red
- 9 Dark red
- 10 Purple
- 11 Brown
- 12 Black

- Before ripening*
- 1 White
  - 2 Cream
  - 3 Light Green
  - 4 Medium Green
  - 5 Dark Green
  - 6 Purple
  - 7. Other (e.g. orange)

- 1 Large > 100 g
- 2 Intermediate 20g – 100g
- 3 Small < 20 g

- To perform on the EUROPEPLAND collection

## Task 2 – Phenotyping and genotyping (M6-M18)

7. External immature fruit color (1. white/ 2. cream/ 3. light green/ 4. medium green/ 5. dark green/ 6. purple).

1

2

3

4

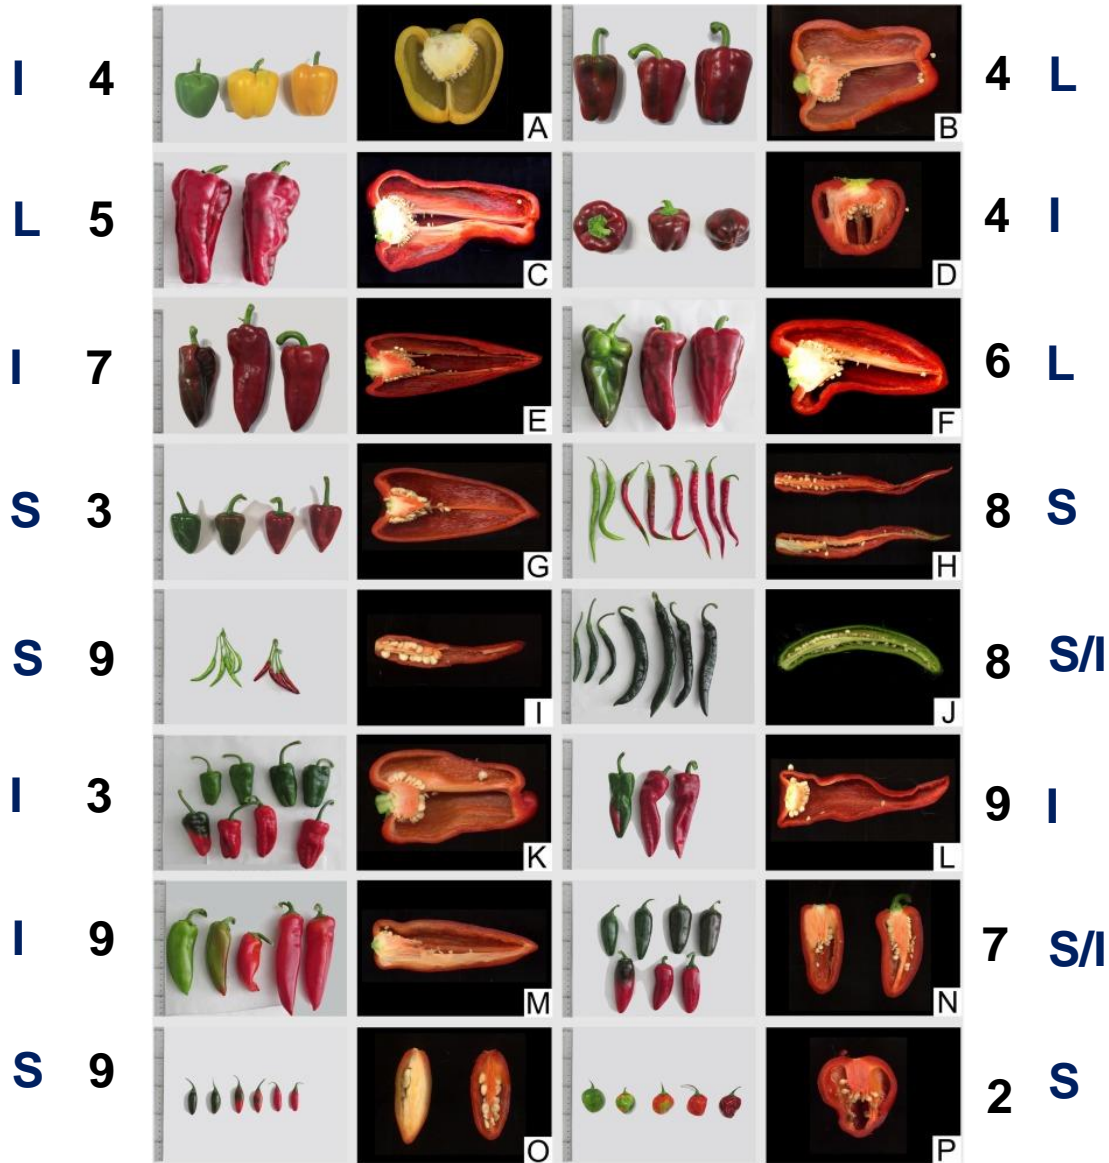

5

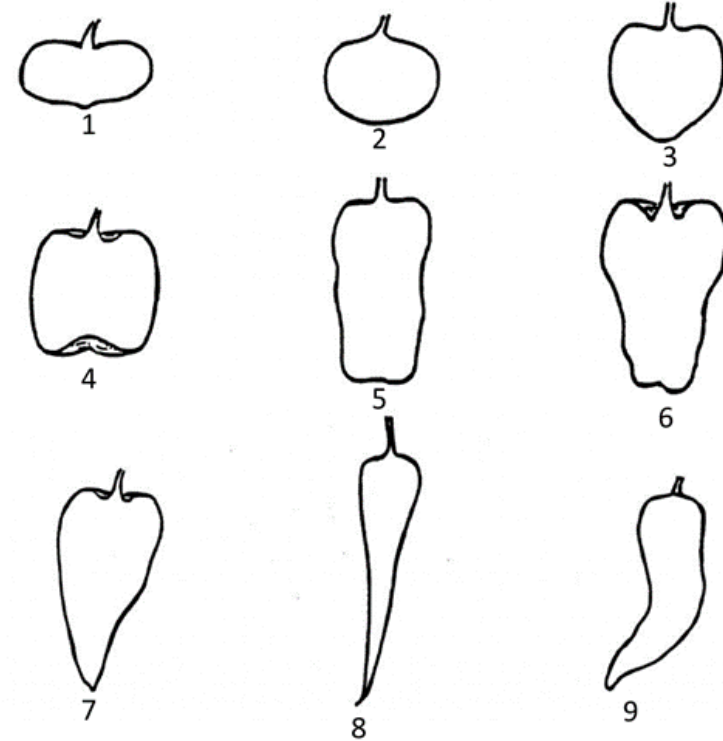

6

9. Fruit predominant shape (1. oblate/ 2. circular/ 3. cordate/ 4. blocky/ 5. rectangular/ 6. trapezoidal/ 7. conical/ 8. elongated/ 9. hornshaped).  
 3. heart-shape

**L = Large**  
**I = Intermediate**  
**S = Small**

## Task 2 – Phenotyping and genotyping (M6-M18)

- Two partners will perform salt stress (CNR-IBBR) and biochemical analysis (CREA IT)
- Will focus on few accessions once the core collection has been established
- Material to be selected in the middle of next year
- Provide new information on the quality and resilience of selected genotypes (< 10)

# Task 2 – Phenotyping and genotyping (M6-M18)

15K for DNA isolation, genotyping and phenotyping (CREA)

Position	Material	Item	Volume	Price/Plate (€)	Total (€)
10	IL CA010 GL	10K Pepper array	1 plate	3.120,00	3.120,00

4 plates = 384 samples

EU-LRs genotyped from EVA

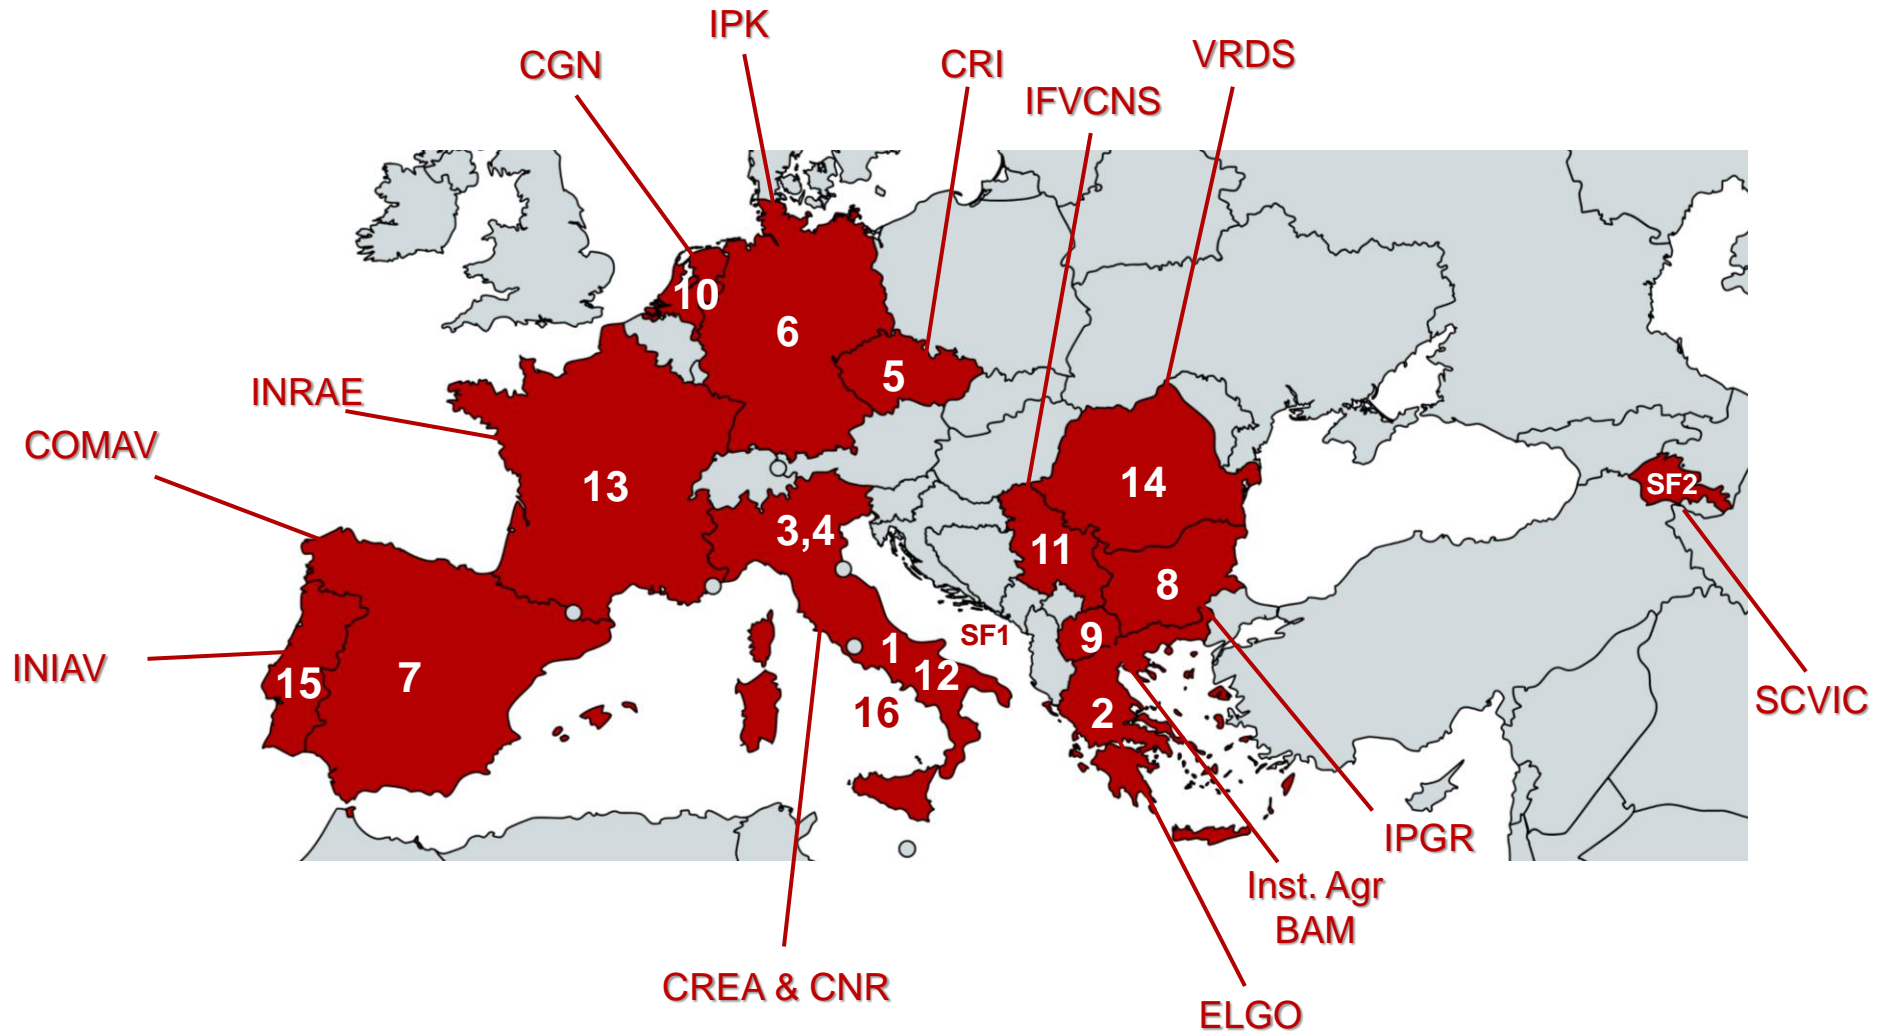

420

## Core collection development

- A template will be shared among partners  4-8 November
- Each partner provide the list of potential material to exchange considering the availability of seeds  End of November
- Define the collection based on the diversity  End of Year
  - Geographical (1<sup>st</sup> priority)
  - Phenotypic (2<sup>nd</sup> priority)
- ☐ Materials providing  First quarter of 2025

□ Balance across European regions (East, Continental, Mediterranean)

## Material exchange

- Seeds are preferred to be exchanged by MTA or sMTA
  - 15 seeds high germinability will be fine
  - Bulk leaves from at least 3 representative plantlets
- 
- Harvest in ice 3-4 young leaves from young plantlets (after 5-6 true leaves) -> put in eppendorf and freeze at -80 °C
  - Send the tubes in dry ice to CREA
- 
- Avoiding liophylization and shipping by regular mail
  - Bad quality DNA - > genotyping error
  - Only if very few seeds are available
  - Shipping tubes in dry ice or in sealed vacuum bags

 To finalize by March 2025

## Task 3 – Data integration an analysis

DOI:

- Unique and permanent digital identifier of a (digital) object
- Metadata for the description of the object
- Name resolution by a resolver system, e.g. doi.org

Advantages:

- Quasi-standard for PGR material
- High acceptance in the scientific community
- Allows traceability when material is distributed, e.g. to another genebank
- Enables insights into the use of PGR, e.g. from publications
- Hierarchical relationships possible, e.g. for derived material (SSD line from genebank accession)

Assignment of DOIs

- Assignment via EURISCO (*to be checked*)

Each partner provide by itself or centralized

❖ TBD

A screenshot of the EURISCO website. The browser address bar shows "eurisco.ipk-gatersleben.de/apex/eurisco\_ws/r/eurisco/home". The website header includes the ECP-GR logo and the text "eurisco Finding seeds for the future". A navigation menu on the left lists: Home, Passport data, C&E data, Export data, Statistics & documents, About, News, Newsletter subscription, Intranet ex situ, and Intranet in situ CWR. The main content area has a "Welcome to EURISCO" heading, followed by "About EURISCO" and a paragraph describing the European Search Catalogue for Plant Genetic Resources (EURISCO) as a network of 43 member countries. It also mentions the project "Extension of EURISCO for Crop Wild Relatives (CWR) in situ data on preparation of pilot countries' data sets".

## Task 3 – Data integration and analysis

- Check data quality
- Filtering SNP data
- Genomic diversity and Population STRUCTURE
- Phylogenesis
- Integration of phenotypic data
- Additional analysis (e.g. GWA, genomic regions under selection, etc)

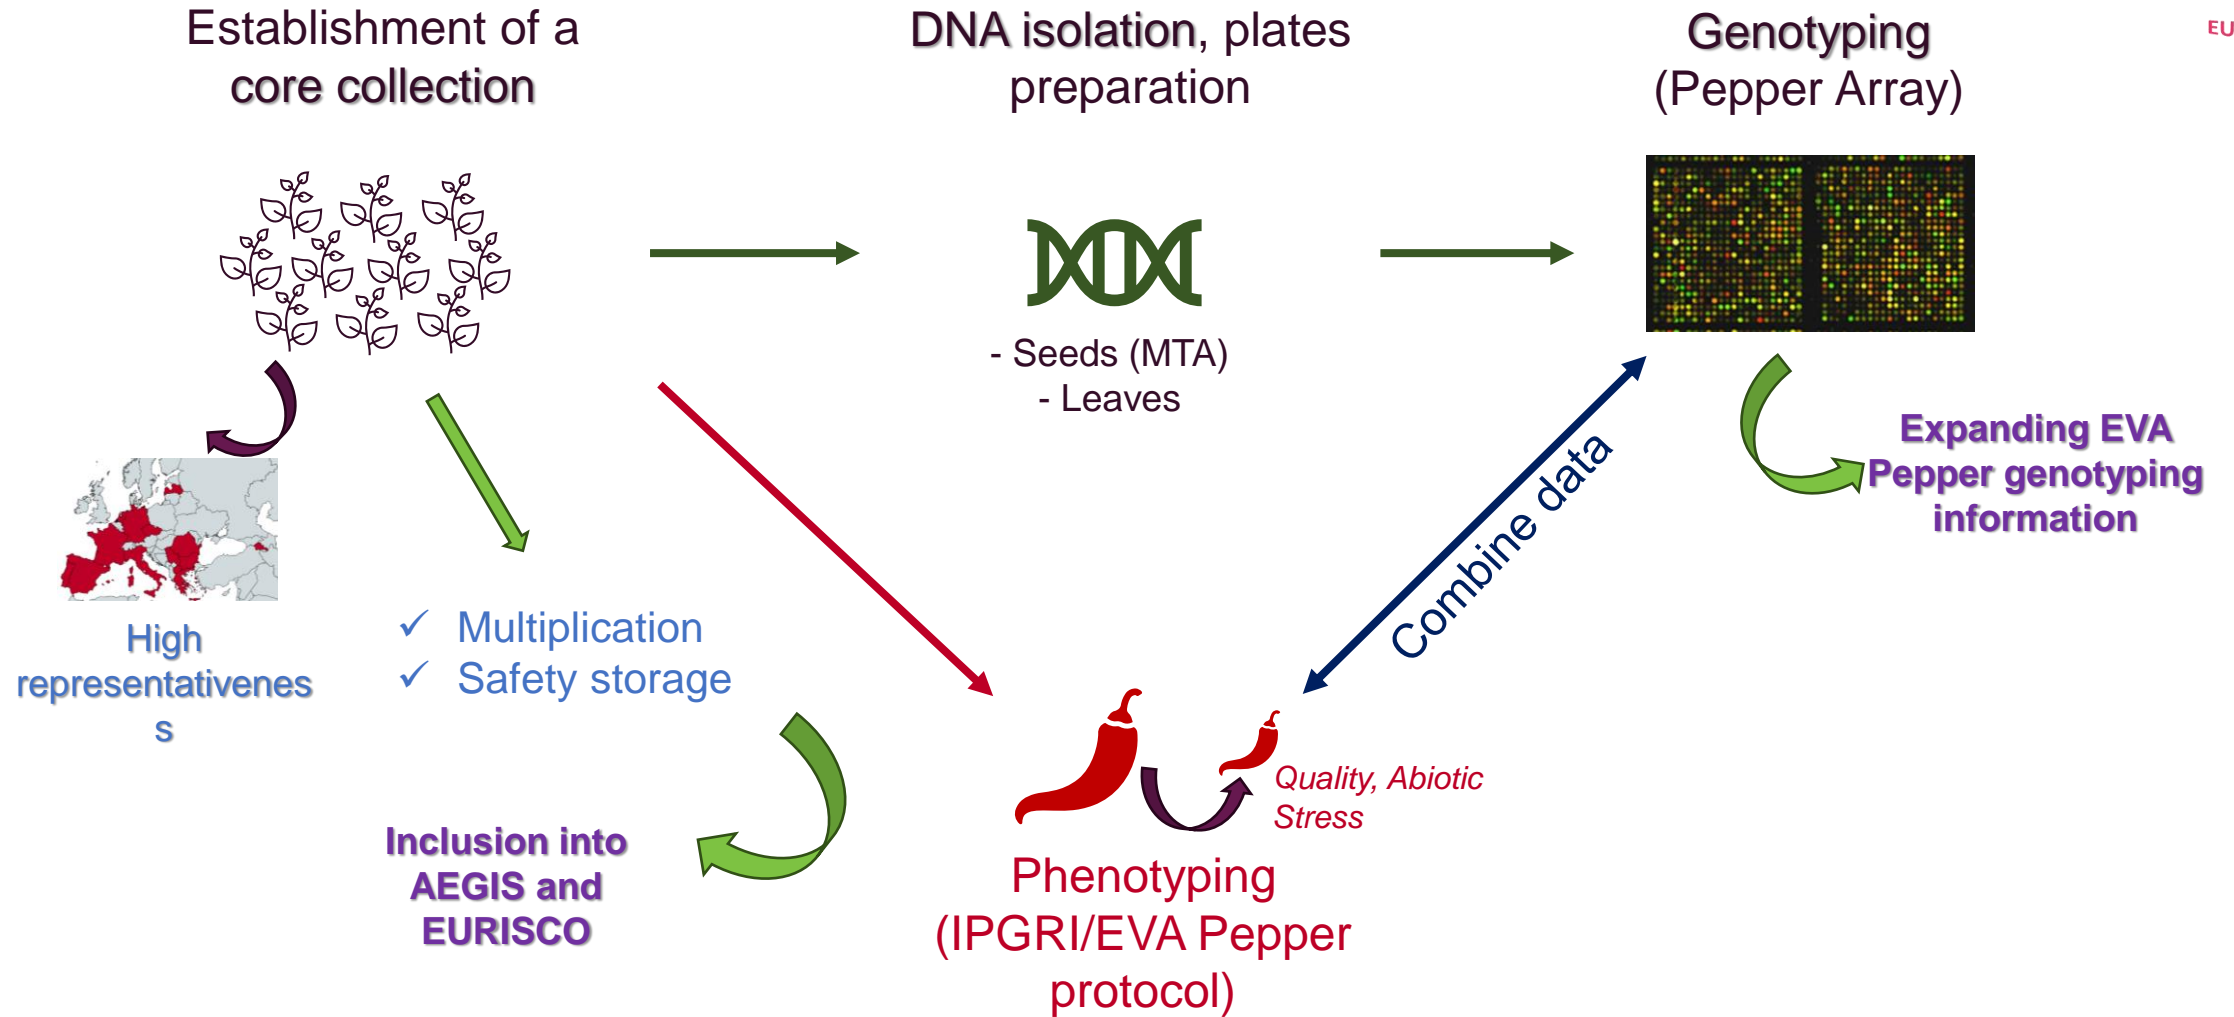

## Task 4 – Meetings and dissemination (M1-M24)

- Kick-off meeting (hybrid) – 31 October 2024
  
- Interim meeting next year same period
  
- Final meeting June-July 2026
  
- ☐ Any brief meeting if needed to discuss any issue

# Time scale of activities

Task	Year	2024				2025												2026							
	Main activity/Month	9	10	11	12	1	2	3	4	5	6	7	8	9	10	11	12	1	2	3	4	5	6	7	8
<b>T1</b>	<b>Core collection establishment</b>																								
<b>T2</b>	<b>Seeds/Leaf exchange</b>																								
<b>T2</b>	<b>DNA extraction</b>																								
<b>T2</b>	<b>Genotyping</b>																								
<b>T2</b>	<b>Plant grown and phenotyping</b>																								
<b>T3</b>	<b>Data integration/analysis</b>																								
<b>T4</b>	<b>Meetings</b>																								

*Open for  
discussion*

# *Points of discussion*

- Germplasm selection
- Supplying plant material for genotyping
- Phenotyping activities
- Data integration in EURISCO database and DOI
- Safety storage of the EUROPEPLAND collection
